There is a free version available. Even though it looks like that you are unable to use a lot of features available in the free version, It is more than sufficient to record your ideas or to create something like a sitemap.

The paid versions might seem expensive. However, keep in mind that these things are one-time payment only instead of a monthly subscription service. It might end up saving you money in a long run if you like Xmind and think that you might get a lot use out of it
